SUBJECT INDEX

- Abdominal aortic aneurysm, aortic dissection with, 392-396
- Abdominal malignancy, *See* Intraabdominal malignancy, 271-274
- Abscess
 of diverticulum, 146-147
 hepatic, 31-34
- Abscessogram, of hepatic abscess, 31-34
- Acetabulum
 anteversion, 367
 arc of, measurement, 367
 configuration, 366-367
 femoral head position of, 367
 fractures, 167-173
- Acoustic neuromas, 383-384
- Adenitis, cervical, persistent, in children, 275-278
- Adenoma, pleomorphic, 239-246
- Adenopathy, postoperative anatomic distortion
 simulating, 114
- Adipose tissue, tumor, *See* Lipoma
- Adrenal hemorrhage, 216-218
- Adrenal vein, thrombosis, 216-218
- Aneurysm, *See also* Pseudoaneurysm
 aortic, *See* Aortic aneurysm
 aortopulmonary window, 111-122
 giant, thrombosed, of pericallosal artery, 140-143
- Angelchik antireflux device, 212-215
- Angiography
 of oligodendrogliomas of lateral ventricle, 376-382
 of renal angiomyolipoma, in tuberous sclerosis, 68
- Angiomyolipoma, renal, 67-72
- Ankylosing spondylosis, 65
- Antireflux device, Angelchik, 212-215
- Aorta
 coarctation of, nonobstructive, 95-98
 magnetic resonance imaging of, 279-282
 pseudocoarctation, *See* Aorta, coarctation, nonobstructive
- Aortic aneurysm
 abdominal, aortic dissection with, 392-396
 inflammatory, 128-131
 magnetic resonance imaging of, 279-282
 neoplasm simulating, 113
 simulating neoplasm, 114
- Aortic arch, anomaly, 95-98
- Aortic dissection, with concurrent abdominal aortic aneurysm, 392-396
- Aortic rupture, 392-396
- Aortic valve, ultrafast computed tomography of, 190-192
- Aortic wall, segmental absence of, 279-282
- Aortopulmonary window, normal anatomy and pathology, 111-122
- Appendicitis, 17-25
- Arachnoid cysts, 156-159
- Atrophy, cortical, 73-78
- Azygos veins, 341-345
- Bicornuate uterus, 301-302
- Bile ducts
 calculi, 315-317
 occult, hepatic abscess due to, 31-34
 disease, 261-266
- Biopsy, intracranial, 221-227
- Bolus dynamic computed tomography, in evaluation of pulmonary sequestration, 335-340
- Bone
 giant cell tumor of, 307-311
 histiocytoma of, malignant fibrous, 355-358
- Brain
 biopsy, 221-227
 cysts, 156-159
 disease, inherited, metabolic, 73-78
 intracerebral metastasis of calcified carcinoma of lung to, 389-391
 midbrain hemorrhage, 385-388
 subependymal cortical heterotopia, 312-314
- Breast, squamous cell carcinoma of primary, 359-363
- Bronchogenic carcinoma, inferior pulmonary ligament lymphadenopathy in, 303-306
- Calcification, in Tietze's syndrome, 83-87
- Calcified carcinoma, of lung, and intracerebral metastases, 389-391
- Calculi bile ducts, 315-317
 occult, 31-34
- Carcinoma
 bronchogenic, 303-306
 calcified, of lung, intracerebral metastasis of, 389-391
 esophageal, unusual metastases from, 205-207
 hepatocellular, fibrolamellar, 27-29
 Merkel cell, 291-293
 metastatic, of stomach and duodenum, 283-287
 nasopharyngeal, in children, 275-278
 pancreatic, 5-15, 247-253, 263-264
 renal cell, 294-296
 squamous cell
 in children, 275-278
 primary, of breast, 359-363
- Cardiovascular magnetic resonance imaging, 279-282
- Cartilaginous mass, Tietze's syndrome, 83-87
- Catheters, central venous, *See* Central venous catheters
- Central venous catheters, complications of, 267-270
- Cerebral palsy, hip in, 364-369
- Ceroid lipofuscinosis, neuronal, 73-78, 160-166
- Cervical adenitis persistent, in children, 275-278

- Cervical spine
 eosinophilic granuloma of, without vertebrae plana, 346-349
 posterior longitudinal ligament ossification at, 61-65
- Chemotherapy, of disseminated necrotizing leukoencephalopathy, 39-43
- Chest wall, anterior, in Tietze's syndrome, 83-87
- Children, See Infants and children
- Cholangiocarcinoma, hepatolithiasis complicated by, 315-317
- Cholangiography, See Endoscopic retrograde cholangiopancreatography
- Cholelithiasis, 31-34
- Choroid plexus, lipoma, 57-60
- Circumcaval ureter, See Ureter, retrocaval
- CIRS phantom, 103-106
- Claude's syndrome, clinical and computed tomography correlations, 209-211
- Coarctation of aorta, See Aorta, coarctation of
- Colitis, pseudomembranous, computed tomography of, absorption and excretion of dilute gastrografin during, 236-238
- Colon, inflammation, 144-150
- Colovesical fistulas, 148-149
- Computed tomography-guided intracranial biopsy and cyst aspiration, 221-227
- Computed tomography scan
 of adrenal vein thrombosis, 216-218
 of aneurysm, giant, thrombosed, of pericallosal artery, 140-143
 of Angelchik antireflux device, 212-215
 of aortic aneurysm, inflammatory, 128-131
 of aortic dissection with concurrent abdominal aortic aneurysm, 392-396
 of aortopulmonary window, 111-122
 in appendicitis, 17-25
 application to epidurography, lumbar, 193-199
 of arachnoid cysts, 156-159
 of brain, of intracerebral metastases, of calcified carcinoma of lung, 389-391
 of central venous catheter complications, 267-270
 of ceroid lipofuscinosis, neuronal, 73-78
 chest, of mediastinal contour lines correlated to chest radiography, 254-260
 of Claude's syndrome, 209-211
 in coarctation, nonobstructive, 95-98
 in colitis, pseudomembranous, absorption and excretion of dilute gastrografin during, 236-238
 contrast enhancement, of pulmonary sequestration, 335-340
 in diverticulitis, 144-150
 of endophthalmitis, *Toxocara canis*, 99-101
 epidural contrast, 193-199
 of esophageal carcinoma, 203-207
 of fractures, acetabular, 167-173
 of hemangiopericytoma, infantile, of liver, 370-375
 of hemangiopericytoma, malignant, 297-300
 of hepatocellular carcinoma, fibrolamellar "scar sign" on, 27-29
 of heterotopia, subependymal cortical, 312-314
 of hip reconstruction, unstable, 364-369
 of Hodgkin's disease, of spine, 174-177
 of intercostal veins, superior, 327-334
 of lipoma
 benign, infiltrating, 45-49
 of corpus callosum and choroid plexus, 57-70
 of lymphadenopathy, inferior pulmonary ligament, 303-306
 of Mayer-Rokitansky-Kuster-Hauser syndrome, associated with endometriosis, 301-302
 of mediastinitis, tuberculous, 123-127
 of Merkel cell carcinoma, 291-293
 of mesencephalic hemorrhage and third nerve palsy, 385-388
 of neuroectodermal tumor, intraspinal primitive, 350-354
 of neuromas, acoustic, 383-384
 of oligodendrogliomas, of lateral ventricle, 376-382
 pancreatic, 1-3, 247-253
 of pancreatic pseudocyst wall, of pseudoaneurysm with rupture in, 35-36
 of pancreaticobiliary disease, comparative study with ERCP, 261-266
 of pancreatitis, presenting as pleural effusions, 184-187
 of parotid neoplasia, 239-246
 preoperative, of spinal stenosis, 51-55
 of pseudopolyposis, giant, in Crohn's disease, 288-290
 of pulmonary sulcus metastases simulating intraabdominal malignancy, 271-274
 quantitative, of benign solitary pulmonary nodules, 103-106
 of spine
 cervical, of eosinophilic granuloma of, without vertebrae plana, 346-349
 of giant cell tumors, 307-311
 of malignant fibrous histiocytoma, 355-358
 stenotic spinal canal models derived from, 51-55
 of teratoma, sacrococcygeal, 200-204
 of thorax, 95-98
 of thorotrastosis, 188-189
 of Tietze's syndrome, 83-87
 ultrafast, of mitral and aortic valves, 190-192
 of ureter, retrocaval, 89-91
 of vena cava
 inferior, of interruption, with anomalous continuations, 341-345
 superior, left, of unusual variant of, 178-179
 volumetry, See Volumetry
 of Wilson's disease, 132-135
 X-ray, See X-ray computed tomography scan
- Congenital anomalies
 of right superior intercostal vein, 333-334
 subependymal cortical heterotopia, 312-314
- Connective tissue, disease, 318-321
- Contrast medium
 enhancement, 1-3, 335-340
 gastrografin, See Gastrografin
- Copper, deposition, and Wilson's disease, 132-135
- Corpus callosum, lipoma, 57-60
- Cortical atrophy, 73-78
- Cortical heterotopia, subependymal, 312-314
- Costal cartilage, in Tietze's syndrome, 83-87
- Costochondral junctions, in Tietze's syndrome, 83-87
- Crohn's disease, giant pseudopolyposis in, 288-290
- Cysts, See also Pseudocyst
 arachnoid, 156-159

- aspiration, 221-227
- epidermoid, spinal, 181-183
- pineal, benign, 228-235
- suprasellar, 157-159
- Diffuse idiopathic hyperostosis, 65
- Disseminated necrotizing leukoencephalopathy, magnetic resonance imaging diagnosis of, 39-43
- Diverticulitis, 144-150
- Duodenum, cavitating metastases of, 283-287
- Endometriosis, Mayer-Rokitansky-Kuster-Hauser syndrome associated with, 301-302
- Endophthalmitis, *Toxocara canis*, 99-101
- Endoscopic retrograde cholangiopancreatography, in pancreaticobiliary disease, comparative study with computed tomography, 261-266
- Eosinophilic granuloma, of cervical spine, 346-349
- Epidermoid cysts, spinal, 181-183
- Epidural contrast computed tomography, 193-199
- Epidurography, lumbar, application of computed tomography to, 193-199
- Epilepsy, temporal lobectomy for, magnetic resonance imaging in, 136-139
- ERCP, *See* Endoscopic retrograde cholangiopancreatography
- Esophagus
 - carcinoma, unusual metastases from, 205-207
 - reflux, 212-215
- Fascicular third nerve, palsy, 208-211
- Fat plane, superior mesenteric artery, obliteration of, 247-253
- Femoral-acetabular relationship, measurement, 367
- Femoral head contour, reconstruction, 366
- Femoral torsion, 365-366
- Fibrolamellar hepatocellular carcinoma, "scar sign" on, 27-29
- Fibrosarcoma, in scleroderma, 318-321
- Fibrous histiocytoma, malignant, of bone, 355-358
- Fistula
 - colovesical, 148-149
 - hepatic, abscess-fistula association, 31-34
- Fluid, levels, in acoustic neuroma, 383-384
- Fluid-fluid levels, in giant cell tumors of bone, 151-155
- Fractures, acetabular, 167-173
- Gastrografin, dilute, absorption and excretion of, during computed tomography, in pseudomembranous colitis, 236-238
- Giant aneurysm, intracranial, thrombosed, 140-143
- Giant cell tumor
 - of bone, fluid-fluid levels in, 151-155
 - of spine, 307-311
- Giant pseudopolyps, in Crohn's disease, 288-290
- Granuloma, eosinophilic, of cervical spine, 346-349
- Head, computed tomography of, 156-159
- Heart valves, ultrafast computed tomography of, 190-192
- Hemangioendothelioma, infantile, of liver, in infants and children, 370-375
- Hemangiopericytoma, malignant, 297-300
- Hemiazzygos veins, 341-345
- Hemorrhage
 - in acoustic neuromas, 383-384
 - adrenal, 216-218
 - mesencephalic, and third nerve palsy, 385-388
- Hemosiderin, deposition, and Wilson's disease, 132-135
- Hepatocellular carcinoma, fibrolamellar, "scar sign" on, 27-29
- Hepatolithiasis, complicated by cholangiocarcinoma, 315-317
- Hernia, hiatal, 212-215
- Herniated intervertebral disk, 65
- Heterotopia subependymal cortical, 312-314
- Hiatal hernia, surgery, 212-215
- Hip
 - joint, assessment, 170-171
 - radiology, 167-173
 - reconstruction, unstable, 364-369
- Histiocytoma, malignant fibrous, of spine, 355-358
- Histiocytosis-x, 346-349
- Hodgkin's disease, of spine, 174-177
- Hydrocephalus, 156-159
- Hyperostosis, skeletal, diffuse idiopathic, 65

Kidney

- angiomyolipoma, in tuberous sclerosis, 67-72
- computed tomography of, 236-238
- magnetic resonance imaging of, 67-72
- pyelonephritis and renal cell carcinoma, 294-296

Lateral ventricle, See Ventricle, lateral

- Leukoencephalopathy, disseminated necrotizing, 39-43
- Leukokoria, 99-101

Lipofuscinosis, ceroid, neuronal, 75-78, 160-166**Lipoma, See also Angiomyolipoma**

- benign, infiltrating, 45-49
- choroid plexus, 57-60
- corpus callosum, 57-60
- intracranial, 79-82

Liver

- abscess, due to occult biliary stones, 31-34
- density, increased, 188-189
- hemangioendothelioma of, infantile, in infants and children, 370-375
- hepatocellular carcinoma, fibrolamellar, "scar sign" on, 27-29
- metastases to, of hemangiopericytoma, 297-300

Lobectomy, temporal, 136-139**Lumbar spine, imaging, 193-199****Lung**

- abnormalities, bolus dynamic computed tomography evaluation of, 335-340
- carcinoma, calcified, intracerebral metastasis of, 389-391
- metastases to, of hemangiopericytoma, 297-300

Lymph nodes, calcified, simulating pulmonary thromboembolism, 112-113**Lymphadenopathy**

- inferior pulmonary ligament, 303-306
- unsuspected, 113

Lymphoma, See also Hodgkin's disease

- inferior pulmonary ligament lymphadenopathy in, 303-306
- unsuspected recurrent, 113

Magnetic resonance imaging

- of aortic aneurysm, 279-282
- of cystic pineal lesions, benign, 228-235
- of disseminated necrotizing leukoencephalopathy, 39-43
- of epidermoid cysts, intraspinal, 181-183
- of hemangiopericytoma, malignant, 297-300
- high-field, of Wilson's disease, 132-135
- of Hodgkin's disease, of spine, 174-177
- of lipofuscinosis, neuronal ceroid, 160-166
- of neuroectodermal tumor, intraspinal primitive, 350-354
- renal, of angiomyolipoma in tuberous sclerosis, 67-72
- of sclerosis, mesial temporal, 136-139
- of septum pellucidum lipoma, 79-82
- of squamous cell carcinoma, primary, of breast, 359-363

Malignancy, See also Tumors

- intraabdominal, pulmonary sulcus metastases simulating, 271-274

Mass, See also Tumors

- inflammatory of diverticulum, 146-147

Mayer-Rokitansky-Kuster-Hauser syndrome, associated with endometriosis, 301-302**Mediastinitis**

- central venous catheter induced, 267-270
- tuberculous, 123-127

Mediastinum

- aortopulmonary window, 111-122
- complications of central venous catheters in, 267-270
- contour lines of, 254-260

Merkel cell carcinoma, 291-293**Mesencephalic hemorrhage, and third nerve palsy, 385-388****Mesenteric artery, superior, fat plane, obliteration of, 247-253****Mesial temporal sclerosis, 136-139****Metabolic brain diseases, inherited, 73-78****Metastases**

- cavitating, of stomach and duodenum, 283-287
- of epidermoid carcinoma of esophagus, 205-207
- of hemangiopericytoma, malignant, 297-300
- intracerebral, of calcified carcinoma of lung, 389-391
- pulmonary, in children, 271-274

Metaplasia, squamous, 359-363**Midbrain, hemorrhage, and third nerve palsy, 385-388****Mitral valve, ultrafast computed tomography of, 190-192****Myelography, of neuroectodermal tumor, intraspinal primitive, 350-354****Myelopathy, posterior longitudinal ligament ossification associated with, 61-65****Nasopharyngeal carcinoma in children, 275-278****Neoplasm, See Tumors****Nephritis, See Pyelonephritis****Neurodegenerative disease, ceroid lipofuscinosis, 73-78****Neuroectodermal tumor, intraspinal primitive, arising from sacral spinal nerve root, 350-354****Neuromas, acoustic, 383-384****Neuronal ceroid lipofuscinosis, 73-78, 160-166****Nodules, pulmonary, benign, solitary, 103-106****Oligodendrogliomas, of lateral ventricle, 376-382****Ossification, of posterior longitudinal ligament, 61-65****Palsy, third nerve**

- fascicular, 208-211
- and mesencephalic hemorrhage, 385-388

Pancreas

- carcinoma, 5-15, 247-253, 263-264

- pseudocyst, with pseudoaneurysm formation, 35-38

Pancreaticobiliary disease, comparative study of

- computed tomography and ERCP in, 261-266

Pancreatitis

- complications of, 35-38
- diagnosis, 264
- distinguished from pancreatic carcinoma, 247-253
- presenting as pleural effusions, 184-187

Pancreatography, computed tomography, 1-3**Parotid gland, neoplasia, 239-246****Pelvis, trauma to, 167-173****Percutaneous abscess drainage, 31-34****Pericallosal artery thrombosed giant aneurysm of, 140-143****Pericardial vein, 341-345****Phrenic vein, 341-345**
